Roamie - A Local Companion

1. What It Does
Our system lets visitors explore Luxembourg at their own pace. Simply scan a QR code on your phone to see information, pictures, and audio about any landmark.

2. How It Works

Scan & Go: Point your phone camera at a QR code to open our web app—no downloads needed.

Live Updates: If information changes (like new events), the QR code still works without reprinting.

Language Choice: Content is available in multiple languages. Pick your preferred language when you scan.

3. What You See

Photos & Videos: Enjoy beautiful images and short clips showcasing each spot.

Audio Guides: Listen to narrations in your language for a hands-free experience.

Interactive Maps: View your location and get simple directions.

4. Managing Content
Our team uses an easy online dashboard to add or edit information, upload pictures, and handle different languages.

5. Tracking & Improvements
We gather anonymous scan data to see which places are most popular and make the experience better over time.

6. Security & Privacy

No personal data is collected unless you choose to share it.

All connections are secure and follow privacy rules.

Ready to start? Scan the first code and enjoy your self-guided adventure!
